

§ 104E-15. Transportation of radioactive materials.

(a) The Radiation Protection Commission is authorized to adopt, promulgate, amend, and repeal rules and regulations governing the transportation of radioactive materials in North Carolina, which, in the judgment of the Commission, shall promote the public health, safety, or welfare and protect the environment.

- (1) Such rules and regulations may include, but shall not be limited to, provisions for the use of signs designating radioactive material cargo; for the packing, marking, loading, and handling of radioactive materials, and the precautions necessary to determine whether the material when offered is in proper condition for transport, and may include designation of routes in this State which are to be used for the transportation of radioactive materials.
- (2) Such rules and regulations shall not include the carrier vehicle or its equipment, the licensing of packages, nor shall they apply to the handling or transportation of radioactive material within the confines of a facility licensed by or owned by a federal agency.
- (3) The Commission is authorized to adopt by reference, in whole or in part, such federal rules and regulations governing the transportation of radioactive material which are established by the United States Nuclear Regulatory Commission, the United States Department of Transportation, or the United States Postal Service (or any federal agency which is a successor to any of the foregoing agencies), as such federal rules may be amended from time to time.

(b) The Department is authorized to enter into agreements with the respective federal agencies designed to avoid conflict or duplication of effort in enforcement and inspection activities so that:

- (1) Rules and regulations adopted by the Commission pursuant to this section of this Chapter may be enforced, within their respective jurisdictions, by any authorized representatives of the Department of Health and Human Services and the Department of Transportation, according to mutual understandings between such departments of their respective responsibilities and authorities.
- (2) The Department, through any authorized representative, is authorized to inspect any records of persons engaged in the transportation of radioactive materials during the hours of business operation when such records reasonably relate to the method or contents of packing, marking, loading, handling, or shipping of radioactive materials within the State.
- (3) The Department, through any authorized representative, may enter upon and inspect the premises or vehicles of any person engaged in the transportation of radioactive materials during hours of business operation, with or without a warrant, for the purpose of determining compliance with the provisions of this Chapter and the rules and regulations promulgated by the Commission.

(c) Upon a determination by the Department that any provision of this section, or the rules and regulations promulgated by the Commission are being violated or that any practice in the transportation of radioactive materials constitutes a clear and imminent danger to the public health, property, or safety, it shall issue an order requiring correction as provided in G.S. 104E-13(b). (1975, c. 716, s. 7; c. 718, s. 1; 1989, c. 727, s. 219(22); 1997-443, s. 11A.119(a); 2015-241, s. 14.30(u); 2015-264, s. 54(c).)
